

Day tank sizing screen

Tuesday, November 28, 2023 9:00 AM

Can we show the image , even as a background? We want the input fields to be next to the measurement because it would help the engineer come up with the input values.

Please refer to the excel provided for the formulas. All user input fields in the day tank sizing is required. Day tank and municipal lines are 2 independent calculations . Customer either wants to calculate Day Tank or municipal line. Note this calculation is dependent on flow rate.
